

Downloads

Keep the download page direct and technical. The current stable release should be obvious, and optional tools should be clearly labeled as optional.

Current Stable Release

VCL2FMXConverter v4.1.8 Source Code

Complete source package with mapping packs. Intended for Delphi users who want to build, inspect, and modify the converter.

Download ZIP

User Guide

Step-by-step operating instructions for running conversions and reading the generated reports.

Open PDF

Engineering Guide

Architecture, maintenance notes, conversion flow, and technical guidance for contributors.

Open PDF

License

Open-source license terms for the converter and distributed source package.

Open PDF

Suggested note: The converter is distributed as source code so Delphi developers can build it locally, inspect how conversions are handled, and modify mapping rules for their own projects.

Optional Companion Downloads

Additional Mapping Packs

Optional JSON packs for additional third-party Delphi components. These are transparent rule files, not compiled plugins.

Download ZIP

JSON Mapping Pack Studio

Optional companion tool for creating and editing VCL2FMX mapping-pack JSON files.

Download

Component Mapping Reference

Reference list showing component mappings included with the converter.

Open PDF

Generic Rules Reference

Reference information for general property, event, and conversion rules.

Open PDF

Recommended button order: source ZIP first, User Guide second, Engineering Guide third, optional tools below.
